

## Year 5 Learning and Progression Steps for Mathematics

### What are Learning and Progression Steps (LAPS)?

The Learning and Progression Steps are designed to scaffold the learning required in order to meet the expectations of the National Curriculum. Statements in the Lancashire Key Learning for Mathematics document have been broken down into smaller steps to support teachers in planning appropriate learning opportunities. These key pieces of learning will support pupils in becoming fluent in the knowledge and skills of the curriculum and ensure that the learning is effective and sustained.

The number of steps is dependent on the learning and do **not** constitute expectations for the end of each term.

The colour coding is an approximate indicator of end of term expectations.

Orange (including the end of previous year expectation) are the steps in learning for the autumn term.

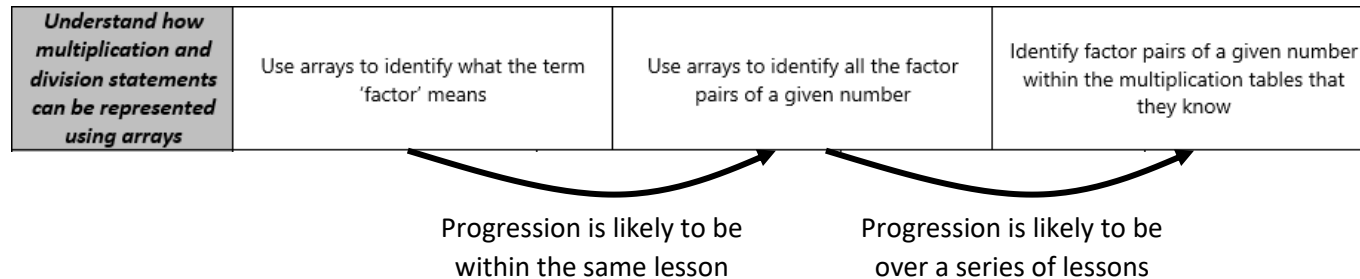

Green are the steps in learning for the spring term.

Yellow are the steps in learning for the summer term and incorporate the end of year expectations.

The colours correspond with the structure of the Lancashire Mathematics Curriculum and reflect how often each learning objective is explicitly taught across the year. Some key learning objectives are not taught in every term, and in some cases not in the summer term. This means that end of year expectations may need to be met before the end of the summer term.

The final step in the progression for each strand of learning is the end of year expectation.

The steps are **not** of equal size and different amounts of time may be required for children to move between individual steps. For example,

Some learning within the same end of year expectation has been split and designed to run concurrently alongside each other. For example,

<b><i>Read and write numbers up to 1000 in numerals and in words</i></b>	Read multiples of 1000 to 10 000 in numerals and in words	Read multiples of 100 to 10 000 in numerals and in words	Read numbers to 10 000 where 0 is not used as a place holder	Read numbers to 10 000 where 0 is used as a place holder	<b><i>Read and write numbers to at least 10 000</i></b>
	Write multiples of 1000 to 10 000 in numerals and in words	Write multiples of 100 to 10 000 in numerals and in words	Write numbers to 10 000 where 0 is not used as a place holder	Write numbers to 10 000 where 0 is used as a place holder	

Some LAPS may need to be completed before another can be started.

### **Where have they come from?**

The Learning and Progression Steps (LAPS) have been derived from the Lancashire Key Learning in Mathematics statements, identified primarily from the National Curriculum 2014 programmes of study.

### **How are they different from the Key Learning Statements?**

The Learning and Progression Steps (LAPS) are smaller, progressive steps which support learning towards the Key Learning in Mathematics expectations.

### **How are they different from the Key Learning Indicators of Performance (KLIPs)?**

The Key Learning Indicators of Performance (KLIPs) document is an assessment tool. The Learning and Progression Steps (LAPS) document is a planning tool and is not intended to be used for summative assessment purposes. However, they may support teachers in judging whether children are on track to meet the end of year expectations at different points throughout the year.

The terms 'entering', 'developing' and 'secure' are used in Lancashire's assessment approach, KLIPs, as summative judgements in relation to age related expectations. Definitions for these terms can be found in the introduction to the KLIPs document.

### **How might Learning and Progression Steps (LAPS) in Mathematics be useful?**

Learning and Progression Steps (LAPS) may be used in a number of ways. For whole class teaching, LAPS may be used to support differentiation. When planning, it may be appropriate to use LAPS statements to inform learning objectives for a session or number of sessions. Learning and Progression Steps (LAPS) in Mathematics should be selected according to the learning needs of the individual or group. Emphasis however, should always be on developing breadth and depth of learning to ensure skills, knowledge and understanding are sufficiently embedded before moving on.

The LAPS should **not** be used as an assessment tool, but they can inform teachers about children's progress towards the end of year expectations at the end of each term.

### **Are LAPS consistent with the other resources from the Lancashire Mathematics Team?**

Yes, the LAPS are related to the content of the Mathematics Planning Support Disc and also the Progression Towards Written Calculation Policies and the Progression in Mental Calculation Strategies.

These can be found on the website:

# Key Learning in Mathematics – Year 5

Number – number and place value	Number – addition and subtraction	Number – multiplication and division
<ul style="list-style-type: none"> <li>Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000</li> <li>Count forwards and backwards in decimal steps</li> <li>Read, write, order and compare numbers to 1,000,000 and determine the value of each digit</li> <li>Read, write, order and compare numbers with up to 3 decimal places</li> <li>Identify the value of each digit to three decimal places</li> <li>Identify represent and estimate numbers using the number line</li> <li>Find 0.01, 0.1, 1, 10, 100, 100 and other powers of 10 more or less than a given number</li> <li>Round any number up to 1,000,000 to the nearest 10, 100, 1000, 10,000 and 100,000</li> <li>Round decimals with two decimal places to the nearest whole number and to one decimal place</li> <li>Multiply/divide whole numbers and decimals by 10, 100 and 1,000</li> <li>Interpret negative numbers in context, count on and back with positive and negative whole numbers, including through zero</li> <li>Describe and extend number sequences including those with doubling/halving or multiplying/dividing by 10 and where the step size is a decimal</li> <li>Read Roman numerals to 1,000 (M); recognise years written as such</li> <li>Solve number and practical problems that involve all of the above</li> </ul>	<ul style="list-style-type: none"> <li>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</li> <li>Select a mental strategy appropriate for the numbers involved in the calculation</li> <li>Recall and use addition and subtraction facts for 1 and 10 (with decimal numbers to one decimal place)</li> <li>Derive and use addition and subtraction facts for 1 (with decimal numbers to two decimal places)</li> <li>Add and subtract numbers mentally with increasingly large numbers and decimals to two decimal places</li> <li>Add and subtract whole numbers with more than 4 digits and decimals with two decimal places, including using formal written methods (columnar addition and subtraction)</li> <li>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</li> <li>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>Solve addition and subtraction problems involving missing numbers</li> </ul>	<ul style="list-style-type: none"> <li>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</li> <li>Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers</li> <li>Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers</li> <li>Establish whether a number up to 100 is prime and recall prime numbers up to 19</li> <li>Recognise and use square (<math>^2</math>) and cube (<math>^3</math>) numbers, and notation</li> <li>Use partitioning to double or halve any number, including decimals to two decimal places</li> <li>Multiply and divide numbers mentally drawing upon known facts</li> <li>Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes</li> <li>Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers</li> <li>Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context</li> <li>Use estimation/inverse to check answers to calculations; determine, in the context of a problem, an appropriate degree of accuracy</li> <li>Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign</li> <li>Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates</li> </ul>
<b>Number – fractions, decimals and percentages</b>	<b>Geometry – properties of shapes</b>	<b>Measurement</b>
<ul style="list-style-type: none"> <li>Recognise mixed numbers and improper fractions and convert from one form to the other</li> <li>Read and write decimal numbers as fractions (e.g. <math>0.71 = \frac{71}{100}</math>)</li> <li>Compare and order fractions whose denominators are all multiples of the same number (including on a number line)</li> <li>Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths</li> <li>Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents</li> <li>Add and subtract fractions with denominators that are the same and that are multiples of the same number (using diagrams)</li> <li>Write statements <math>&gt; 1</math> as a mixed number (e.g. <math>\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}</math>)</li> <li>Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams</li> <li>Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal</li> <li>Solve problems involving fractions and decimals to three places</li> <li>Solve problems which require knowing percentage and decimal equivalents of <math>\frac{1}{2}</math>, <math>\frac{1}{4}</math>, <math>\frac{1}{5}</math>, <math>\frac{2}{5}</math>, <math>\frac{4}{5}</math> and fractions with a denominator of a multiple of 10 or 25</li> </ul>	<ul style="list-style-type: none"> <li>Distinguish between regular and irregular polygons based on reasoning about equal sides and angles</li> <li>Use the properties of rectangles to deduce related facts and find missing lengths and angles</li> <li>Identify 3-D shapes from 2-D representations</li> <li>Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles</li> <li>Draw given angles, and measure them in degrees (<math>^{\circ}</math>)</li> <li>Identify: <ul style="list-style-type: none"> <li>angles at a point and one whole turn (total <math>360^{\circ}</math>)</li> <li>angles at a point on a straight line and half a turn (total <math>180^{\circ}</math>)</li> <li>other multiples of <math>90^{\circ}</math></li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Use, read and write standard units of length and mass</li> <li>Estimate (and calculate) volume ((e.g., using <math>1\text{ cm}^3</math> blocks to build cuboids (including cubes)) and capacity (e.g. using water)</li> <li>Understand the difference between liquid volume and solid volume</li> <li>Continue to order temperatures including those below <math>0^{\circ}\text{C}</math></li> <li>Convert between different units of metric measure</li> <li>Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints</li> <li>Measure/calculate the perimeter of composite rectilinear shapes</li> <li>Calculate and compare the area of rectangle, use standard units square centimetres (<math>\text{cm}^2</math>) and square metres (<math>\text{m}^2</math>) and estimate the area of irregular shapes</li> <li>Continue to read, write and convert time between analogue and digital 12 and 24-hour clocks</li> <li>Solve problems involving converting between units of time</li> <li>Use all four operations to solve problems involving measure using decimal notation, including scaling</li> </ul>
	<b>Geometry – position and direction</b>	
	<ul style="list-style-type: none"> <li>Describe positions on the first quadrant of a coordinate grid</li> <li>Plot specified points and complete shapes</li> <li>Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed</li> </ul>	
	<b>Statistics</b>	
	<ul style="list-style-type: none"> <li>Complete and interpret information in a variety of sorting diagrams (including those used to sort properties of numbers and shapes)</li> <li>Complete, read and interpret information in tables and timetables</li> <li>Solve comparison, sum and difference problems using information presented in all types of graph including a line graph</li> <li>Calculate and interpret the mode, median and range</li> </ul>	

These Learning and Progression Statements (LAPS) are designed to show the necessary steps in learning to make effective and sustainable progress within a single year. They begin with the 'end of year' expectation from the previous year and build up to the 'end of year expectation' of the current year.

The number of steps is dependent on the learning and do **not** constitute expectations for the end of each term.

The steps are **not** of equal size and different amounts of time may be required for children to move between individual steps.

End of Year 4 expectation		Learning and Progression Statements						End of Year 5 expectation	
Number and Place Value	Count in multiples of 6, 7, 9, 25 and 1,000 Count backwards through zero to include negative numbers	Count forwards and backwards in steps of 10, 100 or 1,000 (Year 4 steps) for any given number up to 100,000 (Year 5 number)		Count forwards and backwards in steps of 10,000 without crossing 100,000 boundaries for any given number up to 1,000,000 (Year 5 number)		Count forwards and backwards in steps of 10,000 crossing 100,000 boundaries for any given number up to 1,000,000		Count forwards and backwards in steps of 100 000 for any given number up to 1,000,000	Count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000
	Count forwards and backwards in hundredths	Count forwards in fractional thousandths ( $\frac{1}{1000}$ ) including where hundredths boundaries are crossed, e.g. $\frac{167}{1000}, \frac{168}{1000}, \frac{169}{1000}, \frac{170}{1000}, \frac{171}{1000}, \dots$	Count backwards in fractional thousandths ( $\frac{1}{1000}$ ) including where hundredths boundaries are crossed, e.g. $\frac{171}{1000}, \frac{170}{1000}, \frac{169}{1000}, \frac{168}{1000}, \frac{167}{1000}, \dots$	Count forwards and backwards in fractional thousandths ( $\frac{1}{1000}$ ) including where tenths boundaries are crossed, e.g. $\frac{197}{1000}, \frac{198}{1000}, \frac{199}{1000}, \frac{200}{1000}, \frac{201}{1000}, \dots$	Count forwards and backwards in fractional thousandths ( $\frac{1}{1000}$ ) including where ones boundaries are crossed, e.g. $\frac{997}{1000}, \frac{998}{1000}, \frac{999}{1000}, 1, 1\frac{1}{1000}, \dots$	Count forwards and backwards in decimal thousandths (0.001) including where hundredths or tenths boundaries are crossed, e.g. 1.428, 1.429, 1.430, 1.431	Use knowledge of equivalence to refine the sequence, e.g. 1.428, 1.429, 1.43, 1.431	Count forwards and backwards in decimal thousandths (0.001) including where ones boundaries are crossed, e.g. 5.998, 5.999, 6, 6.001, 6.002	Count forwards and backwards in thousandths
	Read and write numbers to at least 10,000 Recognise the place value of each digit in a four-digit number	Read numbers to 1,000,000 where 0 is not used as a place holder		Read numbers to 1,000,000 where 0 is used as a place holder in any position		Read any number up to 1,000,000			Read, write, order and compare numbers to 1,000,000 and determine the value of each digit
		Write numbers to 1,000,000 where 0 is not used as a place holder		Write numbers to 1,000,000 where 0 is used as a place holder in any position		Write any number up to 1,000,000			
		Order numbers to 1,000,000 where 0 is not used as a place holder		Order numbers to 1,000,000 where 0 is used as a place holder in any position		Order numbers with up to six digits			
Compare numbers to 1,000,000 where 0 is not used as a place holder		Compare numbers to 1,000,000 where 0 is used as a place holder in any position		Compare numbers with up to six digits					
Read and write numbers with up to two decimal places Order and compare numbers beyond 1,000	Read numbers up to three decimal places where 0 is not used as a place holder			Read numbers up to three decimal places where 0 is used as a place holder in any position				Read, write, order and compare numbers with up to 3 decimal places	
	Write numbers up to three decimal places where 0 is not used as a place holder			Write numbers up to three decimal places where 0 is used as a place holder in any position					
	Order numbers with three decimal places where 0 is not used as a place holder			Order numbers with three decimal places where 0 is used as a place holder in any position					
	Compare numbers with three decimal places where 0 is not used as a place holder			Compare numbers with three decimal places where 0 is used as a place holder in any position					
Identify the value of each digit to two decimal places	Use a place value chart or place value counters to support with identifying the value of each digit to three decimal places, e.g. the value of the digit 5 in 4.725 is five thousandths, $\frac{5}{1000}$ or 0.005			Identify the value of each digit to three decimal places in a variety of ways, e.g. the value of the digit 7 in 3.867 is seven thousandths, $\frac{7}{1000}$ or 0.007				Identify the value of each digit to three decimal places	

<b>Identify, represent and estimate numbers using different representations (including the number line)</b>	Identify, represent and estimate numbers on a numberline from 0 to 100,000 where the number line has ten demarcations	Identify, represent and estimate numbers on a numberline from 0 to 1,000,000 where the number line has ten demarcations	Identify, represent and estimate numbers on a numberline from 0 to 100,000 where the number line has no demarcations	Identify, represent and estimate numbers on a numberline from 0 to 1,000,000 where the number line has no demarcations	Identify, represent and estimate numbers up to 100,000 on a number line where the starting point is a number other than 0 (e.g. 50,000 to 75,000)	Identify, represent and estimate numbers up to 1,000,000 on a number line where the starting point is a number other than 0 (e.g. 600,000 to 950,000)	<b>Identify, represent and estimate numbers using the number line</b>
<b>Find 0.1, 1, 10, 100 or 1,000 more or less than a given number</b>	Find 0.01, 0.1, 1, 10, 100, 1000 more or less than a given number up to 1,000,000 without crossing boundaries	Find 10,000 more or less than a given number up to 1,000,000 without crossing 100,000 boundaries	Find 100,000 more or less than a given number up to 1,000,000	Find 0.01, 0.1, 1, 10, 100, 1000 more or less than a given number up to 1,000,000 including where boundaries will be crossed	Find 10,000 more or less than a given number up to 1,000,000 crossing 100,000 boundaries	Find 10,000 more or less than a given number up to 1,000,000 crossing 100,000 boundaries	<b>Find 0.01, 0.1, 1, 10, 100, 1000 and other powers of 10 more or less than a given number</b>
<b>Round any number to the nearest 10, 100 or 1,000</b>	Round any number up to 100,000 (Year 5 number) to the nearest 10, 100 or 1,000 (Year 4 rounding)	Round any number up to 1,000,000 (Year 5 number) to the nearest 10, 100 or 1,000 (Year 4 rounding)	Round any number up to 100,000 to the nearest 10,000	Round any number up to 1,000,000 to the nearest 10,000	Round any number up to 1,000,000 to the nearest 100,000	Round any number up to 1,000,000 to the nearest 100,000	<b>Round any number up to 1,000,000 to the nearest 10, 100, 1000, 10,000 and 100,000</b>
<b>Round decimals (one decimal place) to the nearest whole number</b>	Round decimals with two decimal places to the nearest whole number (e.g. 267.62 rounds to 268)			Round decimals with two decimal places to one decimal place (e.g. 1324.49 rounds to 1324.5)			<b>Round decimals with two decimal places to the nearest whole number and to one decimal place</b>
<b>Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer</b>	Multiply/divide whole numbers and decimals by 10 where 0 is not used as a place holder, e.g. $3.24 \times 10$ or $729 \div 10$	Multiply/divide whole numbers and decimals by 10 where 0 is used as a place holder, e.g. $2.04 \times 10$ or $806 \div 10$	Multiply/divide whole numbers and decimals by 100 where 0 is not used as a place holder, e.g. $5.68 \times 100$ or $8532 \div 100$	Multiply/divide whole numbers and decimals by 100 where 0 is used as a place holder, e.g. $15.106 \times 100$ or $4070 \div 100$	Multiply/divide whole numbers and decimals by 1,000 where 0 is not used as a place holder, e.g. $19.73 \times 1,000$ or $2378 \div 1,000$	Multiply/divide whole numbers and decimals by 1,000 where 0 is used as a place holder, e.g. $33.003 \times 1,000$ or $123\ 006 \div 1000$	<b>Multiply/divide whole numbers and decimals by 10, 100 and 1,000</b>
<b>Order and compare numbers with the same number of decimal places up to two decimal places</b>	Explain the meaning of a negative number in a variety of real life contexts (e.g. below freezing, below sea level, under par (golf), negative goal difference)			Count on and back with positive and negative whole numbers through zero			<b>Interpret negative numbers in context, count on and back with positive and negative whole numbers, including through zero</b>
<b>Describe and extend number sequences involving counting on or back in different steps, including sequences with multiplication and division steps</b>	Describe and extend number sequences where the step size is in multiples of tenths, e.g. 1.4, 1.7, 2.0, 2.3 (step size 0.3)	Describe and extend number sequences where the step size is in multiples of hundredths less than a tenth, e.g. 2.31, 2.37, 2.43, 2.49 (step size 0.06)	Describe and extend number sequences where the step size is in multiples of hundredths greater than a tenth, e.g. 2.42, 2.57, 2.72, 2.87 (step size 0.15)	Describe and extend number sequences where the step size is in thousandths, e.g. 5.742, 5.747, 5.752 (step size 0.005)	Describe and extend number sequences that involve doubling/halving or multiplying/dividing by 10 (e.g. 13, 26, 52, 104 or 14 500, 1450, 145, 14.5, 1.45, 0.145)	Describe and extend number sequences that involve doubling/halving or multiplying/dividing by 10 and where the step size is a decimal	<b>Describe and extend number sequences including those that involve doubling/halving or multiplying/dividing by 10 and where the step size is a decimal</b>

	<p><b>Read Roman numerals to 100 and know that over time, the numeral system changed to include the concept of zero and place value</b></p>	<p>Read Roman numerals using the symbols I, V, X, L, C, D, M where subtracting of the symbols (e.g. a lower value symbol in front of a higher value one such as IX, CM) is not required</p>	<p>Read Roman numerals using the symbols I, V, X, L, C, D, M in any order</p>	<p><b>Read Roman numerals to 1,000 (M); recognise years written as such</b></p>
	<p><b>Solve number and practical problems that involve all of the above and with increasingly large positive numbers</b></p>	<p><b>Children need frequent access to a range of contexts using the content from all of the above.</b></p>		<p><b>Solve number and practical problems that involve all of the above</b></p>

End of Year 4 expectation	Learning and Progression Statements			End of Year 5 expectation
<p><i>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</i></p>	<p>Children need frequent opportunities to select appropriate strategies from the range they have learnt. The most efficient strategy may differ between children as it will be based on their confidence and competence.</p>			<p><i>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</i></p>
<p><i>These steps fit the Lancashire Progression Towards Written Calculation Policies and Progression in Mental Calculations Policies</i></p>				
<p><i>Select a mental strategy appropriate for the numbers involved in the calculation</i></p>	<p>Recognise that the numbers in addition calculations can be reordered to make calculating more efficient e.g. <math>1.7 + 2.8 + 0.3</math> becomes <math>1.7 + 0.3 + 2.8</math> or <math>58 + 47 - 38</math> becomes <math>58 - 38 + 47</math> and use this strategy where appropriate <i>(This should be supported by concrete materials, pictures or jottings)</i></p>	<p>Recognise and solve calculations that involve known or related facts e.g. <math>1.2 + 0.8</math></p>	<p>Recognise calculations that require counting on or back mentally, bridging through a multiple of 10 efficiently e.g. <math>230 - 72</math> becomes <math>230 - 30 - 40 - 2</math> and use this strategy where appropriate <i>(This should be supported by concrete materials, pictures or jottings)</i></p>	<p><i>Select a mental strategy appropriate for the numbers involved in the calculation</i></p>
		<p>Recognise calculations that require counting on or back mentally, bridging through a multiple of 10 efficiently e.g. <math>1995 + 278</math> becomes <math>1,995 + 5 + 273</math> or <math>703 - 128</math> becomes <math>703 - 3 - 125</math> and use this strategy where appropriate <i>(This could be supported by pictures or jottings)</i></p>	<p>Recognise calculations that require counting on mentally to find the difference e.g. <math>5,003 - 1,960</math> (counting efficiently between the two numbers) and use this strategy where appropriate <i>(This could be supported by a number line)</i></p>	
		<p>Recognise calculations that require mental partitioning e.g. <math>4,300 + 1,400</math> or <math>424 - 250</math> and use this strategy where appropriate <i>(This could be supported by jottings)</i></p>	<p>Recognise calculations that require a mental compensation method e.g. <math>325 + 298</math> becomes <math>325 + 300 - 2</math> and use this strategy where appropriate <i>(This could be supported by pictures or jottings)</i></p>	
<p><i>Recall and use addition and subtraction facts for 100</i> <i>Recall and use +/- facts for multiples of 100 totalling 1,000</i></p>	<p>Recall and use addition and subtraction facts for 1 (with decimal numbers to one decimal place)</p>	<p>Recall and use addition and subtraction facts for 10 (with decimal numbers to one decimal place)</p>	<p><i>Recall and use addition and subtraction facts for 1 and 10 (with decimal numbers to one decimal place)</i></p>	
<p><i>Derive and use addition and subtraction facts for 1 and 10 (with decimal numbers to one decimal place)</i></p>	<p>Use practical apparatus (e.g. place value counters, a 10 by 10 grid, a 100 bead string) and known facts (e.g. <math>42 + 58 = 100</math>) to create addition and subtraction facts for 1 with decimal numbers to two decimal places (e.g. <math>0.42 + 0.58 = 1</math>)</p>	<p>Create generalisations based on addition and subtraction facts for 1 (e.g. the hundredths digits sum to 0.1 and the tenths digits sum to 0.9 and these add to give a total of 1)</p>	<p>Derive and use addition and subtraction facts for 1 (with decimal numbers to two decimal places)</p>	<p><i>Derive and use addition and subtraction facts for 1 (with decimal numbers to two decimal places)</i></p>

<b>Add and subtract mentally combinations of two and three digit numbers and decimals to one decimal place</b>	Add and subtract a four-digit number to/from another four-digit number where no boundaries are crossed e.g. $5,124 + 1,352$	Add and subtract increasingly large numbers using appropriate mental strategies e.g. $147,654 - 147,632$ or $2,854 + 1,400$		<b>Add and subtract numbers mentally with increasingly large numbers and decimals to two decimal places</b>
	Add and subtract a number with two decimal places to/from a whole number, e.g. $4.32 + 4$	Add and subtract a number with two decimal places to/from another where the tenths boundary is not crossed, e.g. $5.45 - 2.33$	Add and subtract a number with up to two decimal places to/from another where only one boundary is crossed, e.g. $14.68 + 3.8$ or $6.32 - 3.5$ <i>(This could be supported by jottings or a number line)</i>	
<b>Add and subtract numbers with up to 4 digits and decimals with one decimal place using the formal written methods of columnar addition and subtraction where appropriate</b>	Add whole numbers with more than 4 digits including combinations of numbers with different amounts of digits e.g. $4,689 + 67,302 + 785 =$	Add decimals with two decimal places, e.g. $53.67 + 26.54 =$	Add decimals with up to two decimal places, e.g. $154.7 + 68.56 =$	<b>Add and subtract whole numbers with more than 4 digits and decimals with up to two decimal places, including using formal written methods (columnar addition and subtraction)</b>
	Subtract whole numbers with more than 4 digits including pairs of numbers with different amounts of digits, e.g. $54,368 - 9,279$	Subtract decimals with two decimal places, e.g. $206.04 - 72.36$	Subtract decimals with up to two decimal places including pairs of numbers with different amounts of digits, e.g. $245.3 - 72.64$	
<b>Estimate; use inverse operations to check answers to a calculation</b>	Round whole numbers within a calculation to an appropriate power of 10 e.g. $45,267 + 8,214 + 210$ becomes $45,300 + 8,000 + 200$	Round decimals with two decimal places within a calculation to an appropriate power of 10 e.g. $267.62 + 34.78$ rounds to $270 + 30$		<b>Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy</b>
<b>Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</b>	<b>Children need frequent access to a range of contexts using the content from all of the above.</b>			<b>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</b>
<b>Solve addition and subtraction problems involving missing numbers</b>	Represent and solve a problem using structured pictorial representations such as the bar model			<b>Solve addition and subtraction problems involving missing numbers</b>

Number – Multiplication and Division	End of Year 4 expectation	Learning and Progression Statements					End of Year 5 expectation
	<i>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</i>	Children need frequent opportunities to select appropriate strategies from the range they have learnt. The most efficient strategy may differ between children as it will be based on their confidence and competence.					<i>Choose an appropriate strategy to solve a calculation based upon the numbers involved (recall a known fact, calculate mentally, use a jotting, written method)</i>
	Recognise and use factor pairs and commutativity in mental calculations	Understand the term 'multiple' and identify multiples within known tables or counting patterns in hundreds and thousands		Identify multiples of 2, 5, 10, 25, 50 and 100 using rules of divisibility		Identify multiples of 3, 4, 6, 9, 20, using rules of divisibility	Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers
		Use and derive multiplication and division facts to identify factors within known tables	Use a list strategy to identify common factors of two numbers within known tables	Use known facts to derive factors of multiples of 10 and 100, e.g. 240 could be factorised to $6 \times 40$	Identify factors of numbers beyond known tables (e.g. 91)	Use a list strategy to identify common factors of two numbers beyond known tables	
	Recall multiplication and division facts for multiplication tables up to $12 \times 12$	Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers					Know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers
	Recall multiplication and division facts for multiplication tables up to $12 \times 12$	Establish whether a number up to 100 is prime			Recall prime numbers up to 19		Establish whether a number up to 100 is prime and recall prime numbers up to 19
	No equivalent in Y4	Recognise that a square number is the product of two equal integers and can be written using <sup>2</sup> notation, e.g. $7 \times 7 = 7^2$	Recognise and use square numbers up to $12^2$		Recognise that a cube number is the product of three equal integers and can be written using <sup>3</sup> notation, e.g. $4 \times 4 \times 4 = 4^3$	Recognise and use cube numbers for $1^3, 2^3, 3^3, 4^3, 5^3$ and $10^3$	Recognise and use square ( <sup>2</sup> ) and cube ( <sup>3</sup> ) numbers, and notation
	<i>Use partitioning to double or halve any number, including decimals to one decimal place</i>	Use partitioning to double any decimal number to two decimal places					<i>Use partitioning to double or halve any number, including decimals to two decimal places</i>
Use partitioning to halve any decimal number to two decimal places where all the digits are even, e.g. halve 4.68			Use partitioning to halve any decimal number to two decimal places where not all the digits are even, e.g. halve 6.74				

Use place value, known and derived facts to multiply and divide mentally, including: - multiplying by 0 and 1 - dividing by 1 - multiplying together three numbers	Multiply a two-digit number by a one-digit number using a partitioning strategy	Use knowledge of place value and multiplication facts to multiply multiples of 100 and 1,000 by a one-digit number e.g. $3000 \times 8 = 24,000$	Multiply $10 \times 10$ using knowledge of factorising and tables facts e.g. $60 \times 40 = 6 \times 4 \times 10 \times 10$	Use knowledge of place value and multiplication facts to decimals by a one-digit number e.g. $0.7 \times 6 = 4.2$	Multiply a U.t number by a one-digit number using a partitioning strategy	Use compensation strategy to multiply $H99 \times U$	Multiply and divide numbers mentally drawing upon known facts
	Use knowledge of place value and multiplication facts to divide related larger numbers e.g. $6,300 \div 9 = 700$	Divide a three-digit number by a one-digit number using a partitioning strategy e.g. $942 \div 6$ becomes $(600 \div 6) + (300 \div 6) + (42 \div 6)$	Use knowledge of place value and multiplication facts to divide related decimal numbers where the dividend is scaled down e.g. $3.2 \div 8 = 0.4$	Use knowledge of place value and multiplication facts to divide related decimal numbers where the dividend and divisor are scaled down e.g. $3.2 \div 0.8 = 4$			
	No equivalent objective in Y4	Children need frequent access to a range of contexts using the content from all of the above.					Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes
Multiply two-digit and three-digit numbers by a one-digit number using formal written layout	Multiply a 4 digit by a 1 digit number using grid method	Multiply a 2 digit by a 2 digit number using grid method	Multiply a 3 digit by a 2 digit number using grid method	Multiply a 4 digit by a 2 digit number using a formal written method	Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers		
Divide numbers up to 3 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	Divide a 4 digit number by a 1 digit number		Divide a 4 digit number by a 1 digit number and interpret remainders appropriately for the context		Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context		
Use estimation and inverse to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy	Estimate multiplication by rounding to the nearest multiple of 10, 100 or 1,000 and using related facts e.g. $3,842 \times 6 \approx 4,000 \times 6$		Use inverse to check the answer to a calculation, e.g. $4,256 \div 4 = 1,064$ can be checked by carrying out the following calculation correctly: $1,064 \times 4$		Use estimation/inverse to check answers to calculations; determine, in the context of a problem, an appropriate degree of accuracy		
	Estimate division by rounding to the nearest multiple of 10, 100 or 1,000 of the divisor and using related facts e.g. $3,452 \div 6 \approx 3,600 \div 6$		Use inverse to check the answer to a calculation, e.g. $278 \times 6 = 1,668$ can be checked by carrying out the following calculation correctly: $1,668 \div 6$				

<p style="background-color: #ccccff; padding: 5px;">Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, <i>division (including interpreting remainders)</i>, integer scaling problems and harder correspondence problems such as n objects are connected to m objects</p>	<p style="background-color: #ffff00; padding: 5px;">Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, <i>division (including interpreting remainders)</i>, integer scaling problems and harder correspondence problems such as n objects are connected to m objects</p>	<p>Represent and solve a problem using structured pictorial representations such as the bar model.</p>	<p>Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign</p>
	<p style="background-color: #ffff00; padding: 5px;">Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, <i>division (including interpreting remainders)</i>, integer scaling problems and harder correspondence problems such as n objects are connected to m objects</p>	<p>Represent and solve a problem using structured pictorial representations such as the bar model.</p>	<p>Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates</p>

		Learning and Progression Statements		
		End of Year 4 expectation	End of Year 5 expectation	
Number – Fractions	No equivalent objective in Y4	Recognise a mixed number with a fractional part in halves, thirds or quarters and convert it to an improper fraction and vice-versa	Recognise a mixed number and convert it to an improper fraction and vice-versa	
	Recognise and write decimal equivalents of any number of tenths or hundredths	Read and write decimal numbers as fractions in tenths or hundredths, e.g. $0.9 = \frac{9}{10}$ , $0.71 = \frac{71}{100}$	Read and write decimal numbers as fractions, e.g. $0.8 = \frac{8}{10} = \frac{4}{5}$ , $0.85 = \frac{85}{100} = \frac{17}{20}$	
	Compare and order unit fractions and fractions with the same denominators (including on a number line)	Compare two fractions where the denominator of one fraction is a multiple of the denominator of the other fraction, e.g. compare $\frac{2}{3}$ and $\frac{7}{9}$	Compare two fractions whose denominators are both multiples of the same number, e.g. compare $\frac{24}{32}$ and $\frac{35}{56}$ (only where the numerator allows a conversion to the common denominator)	Order more than two fractions whose denominators are all multiples of the same number (only where the numerator allows a conversion to the common denominator)
	Recognise and show, using diagrams, families of common equivalent fractions	Identify, name and write equivalent fractions of a given fraction by using multiplication and division facts, e.g. $\frac{5}{7} = \frac{40}{56}$	Identify, name and write equivalent fractions for tenths and hundredths, e.g. $\frac{85}{100} = \frac{17}{20}$	Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths
	Recognise and write decimal equivalents of any number of tenths or hundredths  Recognise and write decimal equivalents to $\frac{1}{4}$ , $\frac{1}{2}$ , $\frac{3}{4}$	Recognise and use thousandths, e.g. $\frac{3}{1000} = 0.003$ and vice-versa	Relate thousandths to tenths and hundredths, e.g. $\frac{70}{1000} = \frac{7}{100} = 0.07$ , $\frac{900}{1000} = \frac{9}{10} = 0.9$	Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents

Add and subtract fractions with the same denominator (using diagrams)	Add fractions with denominators that are multiples of the same number where the answer is less than 1, e.g. $\frac{2}{3} + \frac{1}{6} = \frac{4}{6} + \frac{1}{6} = \frac{5}{6}$		Add fractions with denominators that are multiples of the same number where the answer is greater than 1, e.g. $\frac{2}{5} + \frac{9}{10} = \frac{4}{10} + \frac{9}{10} = \frac{13}{10} = 1\frac{3}{10}$ ; $1\frac{1}{4} + 3\frac{7}{8} = 1\frac{2}{8} + 3\frac{7}{8} = 5\frac{1}{8}$		Add and subtract fractions with denominators that are the same and that are multiples of the same number (using diagrams)
	Subtract fractions with denominators that are multiples of the same number, e.g. $\frac{5}{6} - \frac{1}{3} = \frac{5}{6} - \frac{2}{6} = \frac{3}{6}$ within 1		Subtract fractions with denominators that are multiples of the same number that involve mixed numbers, e.g. $1\frac{1}{3} - \frac{5}{6} = 1\frac{2}{6} - \frac{5}{6} = \frac{3}{6} = \frac{1}{2}$ ; $5\frac{5}{6} - 3\frac{1}{3} = 5\frac{5}{6} - 3\frac{2}{6} = 2\frac{3}{6} = 2\frac{1}{2}$		
No equivalent objective in Y4	Use concrete materials or pictorial representations to demonstrate conversion from an improper fraction to a mixed number, e.g. seeing that $\frac{7}{5}$ is the same as 1 whole one and $\frac{2}{5}$ of another whole one		Use multiples of the denominator to identify how many whole ones can be made from the improper fraction and how many fractional parts remain, e.g. $\frac{21}{5}$ can be converted using $\frac{5}{5}$ is 1, $\frac{10}{5}$ is 2, $\frac{15}{5}$ is 3, $\frac{20}{5}$ is 4 and $\frac{1}{5}$ remains so $\frac{21}{5} = 4\frac{1}{5}$		Write statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$ )
No equivalent objective in Y4	Use concrete materials or pictorial representations to multiply proper fractions by whole numbers where the answer is less than 1, e.g. $\frac{1}{7} \times 4 = \frac{4}{7}$	Use concrete materials or pictorial representations to multiply proper fractions by whole numbers where the answer is greater than 1, e.g. $\frac{3}{7} \times 4 = \frac{12}{7} = 1\frac{5}{7}$	Use partitioning to multiply mixed numbers by whole numbers where the fractional part of the answer is less than 1, e.g. $3\frac{1}{5} \times 4 = (3 \times 4) + (\frac{1}{5} \times 4) = 12\frac{4}{5}$	Use partitioning to multiply mixed numbers by whole numbers where the fractional part of the answer is greater than 1, e.g. $3\frac{4}{5} \times 7 = (3 \times 7) + (\frac{4}{5} \times 7) = 21\frac{28}{5} = 21 + 5\frac{3}{5} = 26\frac{3}{5}$	Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams
No equivalent objective in Y4	Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred'	Write percentages as a fraction with denominator 100, and as a decimal	Given a fraction with denominator of 100 or a decimal to two decimal places give the equivalent percentage		Recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal
Solve simple measure and money problems involving fractions and decimals to two decimal places	Children need frequent access to a range of contexts using the content from all of the above.				Solve problems involving fractions and decimals to three places
Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	Given the following fractions $\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}$ and fractions with a denominator of a multiple of 10 or 25, give the equivalent percentage and vice versa		Find percentages of amounts where they are equivalent to the fractions $\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}$ and fractions with a denominator of a multiple of 10 or 25		Solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5}$ and fractions with a denominator of a multiple of 10 or 25

End of Year 4 expectation		Learning and Progression Statements						End of Year 5 expectation
		Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes Identify lines of symmetry in 2-D shapes presented in different orientations		Measure angles to the nearest degree			Identify whether a shape is regular or irregular by measuring its side lengths and angles	
Measure lengths to the nearest millimetre (from Year 3)								
Continue to identify horizontal and vertical lines and pairs of perpendicular and parallel lines		Use the properties of rectangles to deduce related facts and find missing lengths e.g. given the area of a rectangle and the length of one side, calculate the length of the other sides		Use the properties of rectangles to deduce related facts and find missing angles at a vertex when diagonals have been drawn and one angle is given		Use the properties of rectangles to deduce related facts and find missing angles where the diagonals bisect when one angle is given		Use the properties of rectangles to deduce related facts and find missing lengths and angles
Compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes		Identify cubes and cuboids from 2-D pictures of them	Identify other 3-D shapes from 2-D pictures of them	Know that a 'net' is a flat shape that can be folded into a 3-D shape	Identify a net of a cube from a range of nets	Identify a net of other cuboids from a range of nets	Identify a net of other prisms and pyramids from a range of nets	Identify 3-D shapes, including cubes and other cuboids, from 2-D representations
Identify acute and obtuse angles and compare and order angles up to two right angles by size		Know that angles are measured in degrees °	Identify reflex angles as those greater than 180° where two lines meet	Compare all types of angles including reflex angles	Estimate acute angles using knowledge of a right angle and fractions of a right angle e.g. half a right angle is 45°; one third of a right angle is 30° and two thirds of a right angle is 60°	Estimate obtuse angles using knowledge of a right angle and fractions of a right angle e.g. half a right angle is 45°; one third of a right angle is 30° and two thirds of a right angle is 60°, and adding these to 90°	Estimate reflex angles using knowledge of a right angle and fractions of a right angle e.g. half a right angle is 45°; one third of a right angle is 30° and two thirds of a right angle is 60°, and adding these to either 180° or 270°	Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles
Identify acute and obtuse angles and compare and order angles up to two right angles by size		Measure acute angles to the nearest degree		Measure obtuse angles to the nearest degree		Measure reflex angles to the nearest degree by either using a 360° protractor or by calculating the reflex angle by measuring the complementary acute or obtuse angle and subtracting this angle from 360°		Draw given angles, and measure them in degrees (°)
		Draw acute angles to the nearest degree		Draw obtuse angles to the nearest degree		Draw reflex angles to the nearest degree by either using a 360° protractor or by drawing the complementary acute or obtuse angle that gives a sum of 360°, e.g. to draw an angle of 295°, draw the complementary acute angle of 65° but label the reflex angle		

Geometry – Properties of Shapes

Identify acute and obtuse angles and compare and order angles up to two right angles by size	Use information given to calculate missing angles at a point on a straight line and half a turn (total 180°)	Use information given to calculate missing angles at a point and one whole turn (total 360°)	Identify angles that are other multiples of 90°, e.g. when jumping a snowboarder rotates through one and a half turns. Through how many degrees has the snowboarder turned? Answer: 540°	Identify: - angles at a point and one whole turn (total 360°) - angles at a point on a straight line and half a turn (total 180°) - other multiples of 90°
--	--	--	---	---

Geometry – Position and Direction	End of Year 4 expectation	Learning and Progression Statements						End of Year 5 expectation
Describe positions on a 2-D grid as coordinates in the first quadrant	This is consolidation of Year 4 learning and therefore there are no steps towards this end of year expectation						<i>Describe positions on the first quadrant of a coordinate grid</i>	
Plot specified points and draw sides to complete a given polygon	This is consolidation of Year 4 learning and therefore there are no steps towards this end of year expectation						<i>Plot specified points and complete shapes</i>	
Describe movements between positions as translations of a given unit to the left/right and up/down	Identify, describe and represent the position of a rectilinear shape following a reflection in a horizontal or vertical mirror line when the shape has all sides parallel or perpendicular to the mirror line and is not touching the mirror line	Identify, describe and represent the position of a shape following a reflection in a horizontal or vertical mirror line when the shape has some sides that are not parallel or perpendicular to the mirror line and is not touching the mirror line	Identify, describe and represent the position of a shape following a reflection in a horizontal or vertical mirror line when the shape has no sides parallel or perpendicular to the mirror line and is not touching the mirror line	Identify, describe and represent the position of a rectilinear shape following a reflection in a horizontal or vertical mirror line when the shape has all sides parallel or perpendicular to the mirror line and is touching the mirror line	Identify, describe and represent the position of a shape following a reflection in a horizontal or vertical mirror line when the shape has some sides that are not parallel or perpendicular to the mirror line and is touching the mirror line	Identify, describe and represent the position of a shape following a reflection in a horizontal or vertical mirror line when the shape has no sides parallel or perpendicular to the mirror line and is touching the mirror line	<b>Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed</b>	
	Identify and represent the position of a shape following a translation in one direction (left/right or up/down)	Describe the translation for a shape that moves in one direction (left/right or up/down)		Identify and represent the position of a shape following a translation in two directions (left/right and up/down)	Describe the translation for a shape that moves in two directions (left/right and up/down)			

		End of Year 4 expectation	Learning and Progression Statements				End of Year 5 expectation
Statistics	<b>Use a variety of sorting diagrams to compare and classify numbers and geometric shapes based on their properties and sizes</b>	Interpret information in a variety of sorting diagrams	Complete a variety of sorting diagrams with given information		Identify the properties used to sort a set of numbers or shapes in a completed diagram		<b>Complete and interpret information in a variety of sorting diagrams (including those used to sort properties of numbers and shapes)</b>
	<b>Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts, time graphs</b>	Read and interpret information in a range of tables with different contexts	Complete tables by identifying missing information	Read and interpret information in a range of timetables with different contexts	Complete timetables by identifying missing information		<b>Complete, read and interpret information in tables and timetables</b>
	<b>Solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs</b>	Understand the purpose of different types of graph and identify which is best suited for a particular data set	Answer questions which ask 'How many/much more...?' or 'How many fewer/much less...?' when comparing two categories in a data set	Answer questions which ask 'How many in total...?' for different data readings	Solve question where the answer has to be inferred from a given data set e.g. few ice creams were sold on Tuesday because it was raining		<b>Solve comparison, sum and difference problems using information presented in all types of graph including a line graph</b>
	<b>No equivalent objective in Y4</b>	Calculate the mode of a set of values	Calculate the range of a set of values	Calculate the median for an odd number of values	Calculate the median for an even number of values		<b>Calculate and interpret the mode, median and range</b>
		Identify when it is appropriate to use mode, median and range					

Measurement	End of Year 4 expectation	Learning and Progression Statements					End of Year 5 expectation	
	Estimate, compare and calculate different measures	This is consolidation of Year 4 learning and therefore there are no steps towards this end of year expectation					Use, read and write standard units of length and mass	
	Estimate, compare and calculate different measures	Estimate the capacity of different containers	Estimate the volume of liquid in a container	Build cuboids using cm cubes	Find the volume of different cuboids by counting cubes efficiently	Use cm <sup>3</sup> blocks to build cuboids of a given volume	Estimate the volume of cubes and cuboids by estimating their dimensions	Estimate (and calculate) volume ((e.g., using 1 cm <sup>3</sup> blocks to build cuboids (including cubes)) and capacity (e.g. using water)
	No equivalent objective in Y4	Understand that the units of liquid volume ml and units of solid volume cm <sup>3</sup> have the same value					Understand the difference between liquid volume and solid volume	
	Order temperatures including those below 0°C	Consolidation of Year 4					Continue to order temperatures including those below 0°C	
	Convert between different units of measure [e.g. kilometre to metre; hour to minute]	Convert km (up to 3 decimal places) to m, and vice versa where 0 is not used as a place holder, e.g. 3,756m = 3.756km			Convert km (up to 3 decimal places) to m and vice versa where 0 is used as a place holder, e.g. 72m = 0.072km			Convert between different units of metric measure
		Convert kg (up to 3 decimal places) to g and vice versa where 0 is not used as a place holder, e.g. 7,582g = 7.582kg			Convert kg (up to 3 decimal places) to g and vice versa where 0 is used as a place holder, e.g. 604g = 0.604kg			
		Convert l (up to 3 decimal places) to ml and vice versa where 0 is not used as a place holder, e.g. 2.759l = 2,759ml			Convert l (up to 3 decimal places) to ml and vice versa where 0 is used as a place holder, e.g. 0.093l = 93ml			
	Convert between different units of measure [e.g. kilometre to metre; hour to minute]	Understand and use approximate equivalences between inches and centimetres when given the conversion graph or conversion fact that 1 inch ≈ 2.54cm		Understand and use approximate equivalences between feet and centimetres when given the conversion graph or conversion fact that 1 foot ≈ 30cm		Understand and use approximate equivalences between yards and metres when given the conversion graph or conversion fact that 1 yard ≈ 90cm		Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints
		Understand and use approximate equivalences between pounds and kilograms when given the conversion graph or conversion fact that 1 lb ≈ 500g			Understand and use approximate equivalences between ounces and grams when given the conversion graph or conversion fact that 1 oz ≈ 30g			
Understand and use approximate equivalences between pints and litres when given the conversion graph or conversion fact that 1 pint ≈ 0.6 litres			Understand and use approximate equivalences between gallons and litres when given the conversion graph or conversion fact that 1 gallon ≈ 4.5 litres					
Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	Identify the perimeter of composite rectilinear shapes through accurate measuring to the nearest mm		Calculate/identify the length of missing sides of composite rectilinear shapes		Calculate the perimeter of a composite rectilinear shape where the lengths of some sides are not given		Measure/calculate the perimeter of composite rectilinear shapes	

<p><i>Know area is a measure of surface within a given boundary</i></p> <p><b>Find the area of rectilinear shapes by counting squares</b></p>	<p>Use knowledge of arrays to understand why the area of rectangles can be calculated using length multiplied by width</p>	<p>Calculate the area of rectangles (see progression in mental and written multiplication)</p>	<p>Compare rectangles by area</p>	<p>Calculate and compare the area of rectangle, use standard units square centimetres (cm<sup>2</sup>) and square metres (m<sup>2</sup>)</p>
<p><b>Read, write and convert time between analogue and digital 12- and 24-hour clocks</b></p>	<p>This is consolidation of Year 4 learning and therefore there are no steps towards this end of year expectation</p>			<p><i>Continue to read, write and convert time between analogue and digital 12 and 24-hour clocks</i></p>
<p><b>Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days and problems involving money and measures</b></p>	<p>Convert between different units of time using an appropriate strategy  e.g. How many hours are there in a year?  How many hours are there in a fortnight?  How many full weeks is 337 days?</p>			<p><b>Solve problems involving converting between units of time</b></p>
<p><b>Solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days and problems involving money and measures</b></p>	<p><b>Children need frequent access to a range of contexts using the content from all of the above.</b></p>			<p><b>Use all four operations to solve problems involving measure using decimal notation, including scaling</b></p>
